

# ADJUSTABLE CANDY CANE RAIL RETROFIT

### Easy Installation

A single piece replacement system for easy installation

### Simple Adjustments

A simple handle adjustment easy to fine tune for your project needs

### Time Savings

Easy installation process leads to reduced production downtime

## EASY INSTALLATION COUPLED WITH ROBUST DESIGN

Easily replaces connections for the single filer at the infeed to decorators or base coaters

Adjustable necker infeed option to accommodate larger can applications

Easy installation ensures that the experience minimal downtime as upgrade is performed

Positive hand crane adjustment with locking pin ensures ideal settings for each diameter plant application

## IMPROVED DESIGN

Introducing the ADB diameter adjustable Candy Cane. This new bolt-on retrofit assembly offers a precise, multi diameter adjustable guide.

The new design eliminates the previous issues with diameter swings, offers fine tune adjustments, and exact repeatability once ideal settings are determined. Simple bolt on replacement makes it a logical choice to improve performance and reduce conversion time.
