

JAM BREAKER ASSEMBLY UPGRADE

Easy Installation

No special tools for alignment required

Simple Adjustments

Upgrade allows for simplified direct replacement of the bearing in the field

Time Savings

Easy installation process leads to reduced production downtime

EASY INSTALLATION COUPLED WITH ROBUST DESIGN

High precision upgrade to original hardware allows for longer part life and more reliable performance

Perfect for single filer infeed at the decorators or base coaters

Convenient application to the infeed into the Air Doubling Box

Additional spare parts stock for quick installation and reduced plant downtime

IMPROVED DESIGN

Pride Conveyance Systems is pleased to announce the upgraded Air Doubling Box Jam Breaker Assembly which incorporates a four bolt bearing system. For quick installation and reduced plant downtime, plant personnel can purchase an additional complete Jam Breaker Assembly. The spare assembly aims to reduce the downtime to change out the Jam Breaker poly tube by changing out the complete assembly within a few minutes and reinstalling the new upgrade offline.
